

Category ABAP programming error  
Runtime Errors STRING\_LENGTH\_TOO\_LARGE  
Except. CX\_SY\_RANGE\_OUT\_OF\_BOUNDS  
ABAP Program Y\_CHECK\_COMMENT\_POSITION=====CP  
Application Component Not assigned  
Date and Time 12.09.2020 11:33:37

#### Short Text

Invalid access to a string (too long)

#### What happened?

Error in the ABAP application program.

The current ABAP program "Y\_CHECK\_COMMENT\_POSITION=====CP" had to be terminated because it found a statement that could not be executed.

#### What can I do?

Note which actions and entries caused the error to occur.

Consult your SAP administrator.

Using transaction ST22 for ABAP dump analysis, you can view, manage, and retain termination messages for longer periods.

Using Transaction ST22 for ABAP Dump Analysis, you can look at and manage termination messages, and you can also keep them for a long time.

#### Error analysis

An exception has occurred which is explained in more detail below. The exception is assigned to class 'CX\_SY\_RANGE\_OUT\_OF\_BOUNDS' and was not caught in procedure

"IS\_PSEUDO\_COMMENT" "(METHOD)", nor was it propagated by a RAISING clause.

Since the caller of the procedure could not have anticipated this exception, the current program was terminated.

The reason for the exception is:

An attempt was made in program "Y\_CHECK\_COMMENT\_POSITION=====CP" to access a part of a string using an explicitly specified length.

This length (4) was greater than the current length of the string (3) however.

Access is not possible like this.

#### How to correct the error

The exception must either be prevented, caught in procedure

"IS\_PSEUDO\_COMMENT" "(METHOD)", or

the possibility of it occurring must be declared in the RAISING clause in the procedure.

To prevent the exception, note the following:

Reduce the length that you are using to access the string.

If the error occurs in a non-modified SAP program, you might be able to find a solution in the SAP Notes system. If you have access to the SAP Notes system, check there first using the following keywords:

"STRING\_LENGTH\_TOO\_LARGE" CX\_SY\_RANGE\_OUT\_OF\_BOUNDS

"Y\_CHECK\_COMMENT\_POSITION=====CP" bzw. Y\_CHECK\_COMMENT\_POSITION=====CM005

"IS\_PSEUDO\_COMMENT"

If you cannot solve the problem yourself, please send the following information to SAP:

1. This description of the problem (short dump)

To do this, choose System -> List -> Save -> Local File (unconverted) on the screen you are in now.

2. A suitable system log

To do this, call the system log in transaction SM21. Restrict the time interval to ten minutes before the short dump and five minutes after it. In the display, choose System -> List -> Save -> Local File (unconverted).

3. If these are programs of your own, or modified SAP programs: Source code of these programs  
To do this, choose More Utilities -> Upload/Download -> Download in the Editor.
4. Details regarding the conditions under which the error occurred or which actions and input caused the error.

```

## Information on where terminated

```
The termination occurred in ABAP program or include
"Y_CHECK_COMMENT_POSITION=====CP", in "IS_PSEUDO_COMMENT". The
main program was "SAPLS_CODE_INSPECTOR".

In the source code, the termination point is in line 2 of program or
include "Y_CHECK_COMMENT_POSITION=====CM005".
```

The termination is due to exception "CX\_SY\_RANGE\_OUT\_OF\_BOUNDS" occurring in procedure "IS\_PSEUDO\_COMMENT" "(METHOD)".  
 This exception was not handled locally or declared in the RAISING clause in the procedure's signature however.  
 The procedure is in program "Y\_CHECK\_COMMENT\_POSITION=====CP". The source code begins in line 1 of  
 (include) program "Y\_CHECK\_COMMENT\_POSITION=====CM005".
